Dolby XP Device Requirements and Tips

Follow these device requirements and tips to make sure you can experience Dolby Vision and Dolby Atmos.

iPhone/iPad

iPhone XS and newer running iOS 15.1 or above

iPad Air (3rd gen), iPad mini (5th gen), iPad Pro (3rd gen) and newer running iPadOS 15.1 or above.

FOR DOLBY ATMOS

- Use AirPods (3rd gen), AirPods Pro, AirPods Max, or Beats Fit Pro.
- You can also use the built-in speakers on iPhone (not supported on iPhone SE) or on iPad Pro.

FOR DOLBY VISION

- Disable Low Power Mode.

Android

Android device enabled with Dolby Atmos and/or Dolby Vision.

FOR DOLBY ATMOS

- Turn on Dolby Atmos in your system sound settings.

Apple TV

Apple TV 4K (2018) and newer

FOR DOLBY ATMOS

- Use HDMI to connect a TV, soundbar, or home theater system enabled with Dolby Atmos

FOR DOLBY VISION

- Use HDMI to connect a TV enabled with Dolby Vision

Mac

Use Safari browser to visit

<https://experience.dolby.com>

MacBook Pro (2018), MacBook Air (2018), iMac (2021) or newer, running MacOS 11 Big Sur or above.

FOR DOLBY ATMOS

- Use built-in device speakers.
- Macs with M1 or newer Apple Silicon can also use AirPods (3rd Gen), AirPods Pro, AirPods Max, or Beats Fit Pro.

FOR DOLBY VISION

- Use the built-in display on your Mac.
